

I. Executive Summary

CONCEPT

OTO'S PLANET is an interactive experience in stereoscopic virtual reality (6Dof) that places us in the position of an omniscient spectator, while telling us the story of Oto whose peaceful existence on a tiny planet is disrupted by the arrival of Exo, a small, cumbersome cosmonaut.

During the entire experience, the user will play their own

SYNOPSIS

The one thing Oto loves more than anything is lounging in his hammock while munching on the fruits of the only tree growing on his tiny world, in the company of his pet called Skippy.

His peace and calm will soon be disrupted by the crashing of a small spaceship from which emerges Exo, a hyperactive and cumbersome cosmonaut.

Communication and cohabitation between the two new roommates will soon turn out to be difficult or even impossible.
